

Federation of Western Outdoor Clubs

Winter 2020

President's Greeting

Greetings to all,

FWOC has been, and continues to be, confronted with the dismantling of so many successful efforts to protect our natural world. Thanks to those of you who have assisted along the way. And to those who are now present and dedicated to safeguarding public lands and those critters who call it home.

Our strength is a history of individuals, representing thousands of members, who recognize what is needed to protect, restore and preserve the natural integrity and quality of our ecosystem. Those individuals propose and adopt resolutions to strengthen our shared agenda.

We look forward to working with you to help establish policy that protects our public lands from further encroachment.

Sincerely,
George T. Milne
